TRUE TALK ON TRUE PAINT!

OUR ENORMOUS TRADE

OUR PAINT AND VARNISH DEPARTMENT, one of the largest and most important branches of our enormous institution of general, desirable and strictly dependable merchandise has grown steadily through healthy methods and quality, and such ever increasing yearly volume until we concluded to build our own paint and varnish plant, which we now have in full operation, equipped throughout with machinery of the most modern up-to-date type, thoroughly practical and economical.

We are prepared to convince any one that our paints and varnishes are more reliable and expensively made and a number of times more efficient and durable than most brands on the market.

We particularly desire to impress the fact that in the operation and maintenance of our plant we spare no expense, our success we believe is based upon this, so now in presenting the full details of our line of paints and varnishes, we feel that we can fairly offer better paint for less money than any manufacturer we know.

These conditions you can readily understand, enables us to produce PAINTS AND VARNISHES at prices absolutely lower than low prices, and at practically a saving of 30% to 50%, or, in other words, we give you the advantage of saving the enormous profit which we formerly had to pay the manufacturers. If this should not demonstrate to your satisfaction that our paints and varnishes can be sold at such extremely low prices, we ask that you thoroughly acquaint yourself with this wonderful money-saving advantage, and make a careful comparison of our PREMIER PAINTS AND VARNISHES with any other brands on the market. You cannot possibly do better than to favor us with an order for your requirements in the paint line. A trial is all we ask. Bear in mind our "INSURANCE POLICY" is binding; it is your protection. We guarantee each and every can of Paint, Varnish or Paint product bearing the name PREMIER. (Read our insurance policy on page I.) We will replace gallon for gallon without cost to you any of our products that fail to give the utmost satisfaction.

OUR WONDERFUL OFFER

THE DAY IS PAST FOR MISREPRESENTATION. Our PAINTS and VARNISHES are of the highest quality, regardless of any representation made by other dealers. We desire it to be distinctly understood that the paints and varnishes offered are of a make and quality that are strictly reliable and dependable. They are not only something radically different in the paint and varnish line, but something you can rest assured leaves our NEW PAINT PLANT direct to you, thoroughly tested in the process of manufacture under the watchful eye of Mr. V. Michaelsen, superintendent of our Paint and Varnish Plant, who is probably the best known paint authority in the world today.

This remarkably able and competent man gives his entire attention and personal service to the manufacture of our Paints and Varnishes. He is very anxious to render Our Patrons any assistance he can, and with this end in view solicits you to write him upon any matter pertaining to paints and varnishes.

Every particle of raw material required for the manufacture of our products undergo this severe scrutiny so that you will receive a perfected article impossible to duplicate through any source. This, backed by our "Insurance Policy," has made Premier Paint and Varnish the most durable, uniform and satisfactory that can be produced, and also offering the best paints and varnishes that money can buy.

Uniformity of colors, greater covering capacity, absolute ease of application are the special features of Premier Paint and Varnishes.

SCIENTIFIC PROCESS

IT IS NOT OUR INTENTION HEREIN to describe technically or enter generally into the manufacture of our paints. This information is intended only to impart to you a brief idea of the process of careful and scientific manufacture. Mr. Michaelsen's 30 long years of experience enabled him to find material to produce results, or in other words, get a thorough knowledge of what they will do and how they will act in combination, regardless of the cost of them. He has turned out millions and millions of gallons all over the country, and has made friends wherever it went.

The paint and varnish ingredients are absolutely worthless unless they are properly combined. Perfected machinery, such as we have in our new plant, has made possible the combining of these materials in large quantities which a few years ago seemed impracticable. This machinery is of the very latest type. It has a special patented mixing feature that when in operation is hermetically sealed, which prevents the slightest loss by evaporation or the formation of paint skins. It would seem that this process would be of short duration. The final work of the mixers takes about 20 hours. You can readily see that the combining of the ingredients of our remarkable formula (the result of 30 years research and test by Mr. Michaelsen) without this machinery would be impossible, and we are unwilling to continue to build our paint reputation in any other way than to supply results impossible for unscrupulous competitors to duplicate even were they able to obtain our formula.

This brief outline of PREMIER PAINT manufacture covers the main points in our factory, for after carefully testing the contents of the mixers it is then ready to draw off into tins or wooden kits for the market.

PRICE AND QUALITY

A SAVING OF AT LEAST 50 CENTS PER GALLON. PREMIER READY MIXED PAINTS are equal and even superior to most of the paints sold at \$1.65 to \$2.00 per gallon. Why take chances in buying your paint from a stock that has been on hand for an indefinite period. Any experienced painter will tell you that paint freshly made up is much superior to a paint that has been mixed for some time. It often occurs that dealers will carry paint over from year to year and you have no assurance of getting your paint of uniform color and consistency. In buying PREMIER READY MIXED PAINTS you are absolutely sure of fresh stock of the highest grade of ready mixed paint on the market. When any one offers to sell you a so-called "Better Paint," regardless of price, first ascertain how long they will guarantee the paint, and if they do not guarantee it as we do ours, you may rest assured that it cannot be equal in quality to the PREMIER READY MIXED PAINTS.

CHICAGO HOUSE WRECKING CO., 35th & IRON STREETS, CHICAGO.

Great Paint Announcement

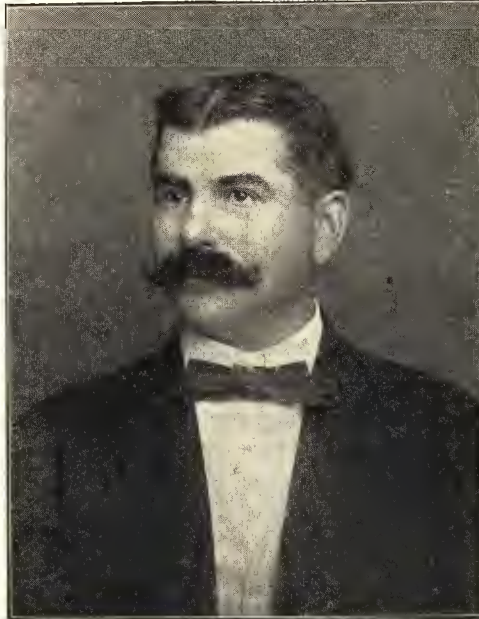

IS NOW OUR
PAINT SUPERINTENDENT

MICHAELSEN

KNOWN FROM
OCEAN TO OCEAN

**Write Michaelsen
—For—
Paint Information**

Quality. The Michaelsen quality is best represented in our Premier Brand Ready Mixed Paint. It is of the highest quality. You cannot possibly do better than to favor us with your order for your requirements in the paint line. Our **PREMIER PAINT** is made only of the best materials it is possible to procure and is manufactured under the direct supervision of the foremost paint maker in the business today. Every shipment comes from freshly made stock, thus insuring **uniformity of color, greater covering capacity and absolute ease of application.** The careful work and study of our paint experts and the personal supervision of each order, makes our **PREMIER PAINTS** the most durable, unfading and satisfactory that can be produced. **That is why we guarantee it so freely.**

**Michaelsen Has Had
30 Years of Honest
Paint Experience**

A Saving of at least 50 cents per gallon. **PREMIER READY MIXED PAINTS** are equal and even superior to most of the paint sold at \$1.65 to \$2.00 per gallon. Why take chances in buying your paint from a stock that has been on hand for an indefinite period? Any experienced painter will tell you that paint freshly made up is much superior to a paint that has been mixed for some time. It often occurs that dealers will carry paint over from year to year and you have no assurance of getting your paint of uniform color and consistency. In buying **PREMIER READY MIXED PAINTS** you are absolutely sure of fresh stock of the highest grade of ready mixed paint on the market.

**His Picture Has
Appeared on More
Than 6,000,000
Cans of Paint**

*Yours for good Paint
V. Michaelsen*

**He Is the Best
Posted Man On
Good Ready Mixed
Paint Today**

Mr. V. Michaelsen, superintendent of our Paint Department, has for 30 years produced paint according to the most modern methods. His picture has appeared on over 6,000,000 cans of paint. Wherever paint is used his name has become a standard of quality. He is a pioneer in the manufacture of high grade paints at popular prices. He is known from ocean to ocean. He has

made only paint of quality. Hereafter every can of paint bought from this company will have **Michaelsen's** guarantee of quality. In his position as head and superintendent of our Paint Department he stands ready to co-operate with paint buyers. Ask him questions—write to him personally—and he will advise you how to obtain best results in your purchase of paint for any purpose.

It is Economy to Paint. The cost of painting a house, barn or fence is so little as compared to the value of protection against rot and decay, caused by the elements, and to the length of time it prolongs your buildings, that you cannot afford to let your house, barn or fence stand unpainted.

Easy to Paint. YOU CAN DO PAINTING BY USING **PREMIER READY MIXED PAINTS.** It no longer requires an expert to make up paints for each job. The mixing of paints is done properly at our factory and the paint is ready to apply. All it requires is to be stirred up and possibly thinned a little. This you can easily do and make a first class job.

**HIS NAME

CHICAGO HOUSE WRECKING CO.
CHICAGO
CAPITAL STOCK AND SURPLUS \$1,000,000

"MICHAELSEN'S INSURANCE POLICY"

We guarantee each and every can or package of Premier Paint, Varnish or Paint Product, bearing the name "Premier," as follows:

If, after applying according to directions (and using pure thinners, if any are used), the result is not entirely workmanlike in **every way** as regards gloss, finish, durability, color or **any other particular whatsoever**, return to us the figures on top of packages, giving date of purchase, and if the fault is ours we will cheerfully replace each and every gallon free of charge.

Remember most paint makers guarantee **house paint only.** Our Paint Insurance covers **every can or package** of Varnish or Paint bearing the name "Premier."

CHICAGO HOUSE WRECKING CO.
V. MICHAELSEN, Supt. of Paint Dept.

Do Not Let Anyone convince you that it is necessary to pay a higher price for paint. It is possible for us to furnish you with our line of **PREMIER PAINTS** at the low prices quoted, owing to the simple fact that our paint trade has developed to the point where we are able to dispose of the entire output of a large factory, and in view of our immense paint sales we are able to make our contracts on the most favorable basis, and are, therefore, in a position to save our customers the large profits that a regular dealer in paints is obliged to make.

Shipments are made from our paint factory and are fresh, properly ground and mixed in exact proportions. This insures the strongest colors, durability and ease of application.

**PIONEER

MANUFACTURE**

CHICAGO HOUSE WRECKING CO., 35th & IRON STREETS, CHICAGO.

How to Figure Amount of Paint Needed!

THE COST, or how to figure the amount of paint needed to paint a house, barn or fence is one of the most important and essential things you should know. The familiarizing ones self with the information explained below will go a great way in tending to prevent a short or an excessive order of paints, although it is better to be over than short, as you can always find something or other around the house that requires painting, thereby improving the appearance of the part painted at practically no cost whatever.

On new work that has not been painted, one gallon of **Premier Ready Mixed Paint** will cover about 250 square feet, two coats. On wood that is to be repainted, that is, if it is in fair condition, one gallon will cover 300 square feet, two coats.

EXAMPLE: Should your building measure 40 feet long, 20 feet wide and have an average height of 25 feet, you figure as follows:

Front and Rear, 20 feet each.....	40 feet.
Two Sides, 40 feet each.....	80 feet.
Total.....	120 feet.
Multiply by average height.....	25
	250 3000 (12 gallons required.)
	500
	500

PLEASE NOTE that you add together the width and the length of the building, multiply by the average height, then divide by 250, which is the covering of one gallon for two coats; and the result, as in the example above, is 12 gallons, which is the amount of paint required to coat a house of the above size, two coats.

COST. We sell **PREMIER READY MIXED PAINTS** in various sized cans, and for the building below you would require two 5 gallon cans and two 1 gallon cans, viz.:

The two 5-gallon cans we furnish at \$1.18 per gallon.....\$11.80
The two 1 gallon cans we furnish at 1.21 per gallon..... 2.42

Total cost to paint building below would be.....\$14.22

FOR PAINTING BARNs or FENCES, use our **PREMIER BARN AND ROOF PAINT** and figure the same way.

DIRECTIONS FOR USING PREMIER READY MIXED PAINTS

FIRST: The surface must be thoroughly dry. Paint is very often applied to surfaces before it is dry, this causes the paint to blister and peel within a few weeks; don't blame the paint, this can happen to any paint. Prepare the surface by giving all knotty or sappy parts a coat of orange shellac. Remove all loose or old paint with a scraper and be sure to dust the surface if you want a nice, clean job.

SECOND: Open the can, then carefully pour off the liquid in an empty can provided for that purpose. Stir thoroughly, gradually adding the liquid you poured off; the paint is ready for use after this is done.

THIRD: For the first coat, reduce the paint to the proportion of one quart of linseed oil to one gallon of paint. Brush out well and let it dry thoroughly before applying the second coat. Allow 5 to 10 days for drying.

FOURTH: Putty all nail holes, cracks, etc. Watch carefully for these imperfections before applying the second coat.

FIFTH: For the second coat apply the paint in its actual thickness, brushing out well. If necessary, thin with linseed oil.

Remember the condition of the surface to be Painted has much to do with the results.

Never apply Paint in cold or wet weather, be sure to allow plenty of time between coats.

Easy and Right Way to Paint!

ON THIS PAGE WE OUTLINE IN THE MOST SIMPLE MANNER, the easiest and right way to paint, how to care for the brush, etc. Many people are led to believe that to properly apply paint it requires the services of a skilled mechanic. Now, while we do not undertake to make professional painters or experts of any of our customers, we know that if you will follow the instructions we outline in as simple a language and as briefly as possible, you will accomplish a piece of work that will not only be attractive in appearance but will give you splendid service. By this we mean it will retain its brilliancy and luster longer. Don't hesitate to write to **MICHAELSEN** for any information you may need. He will consider it a favor if you consult him on any question.

Paints of different kinds are put up in different style packages. For instance, house paints come in packages of this kind. All that is necessary to open this package is to use an ordinary can opener, but remember, not before the paint has been thoroughly agitated.

Never open a can or package before its contents are thoroughly agitated. Shake the can well, as shown in illustration, use a little energy and you will be sure to have the paint in its proper condition, but not ready for use, as there are a few more operations to undergo.

**WRITE
MICHAELSEN
FOR
INFORMATION**

After the package is opened, carefully pour off the liquid into an empty can provided for that purpose, and after pouring off the liquid, stir up the pigment thoroughly until it has entirely dissolved. You will get a much cleaner and attractive job.

**30 YEARS OF
PAINT
EXPERIENCE**

If the pigment is thoroughly stirred up before you apply your paint on the surface to be painted, you are bound to get a uniform mixture. By all means don't fail to do this, as it will avoid streaks in the finished work and will not have the smooth, soft effect.

**BEST
POSTED
MAN
ON
READY
MIXED
PAINTS**

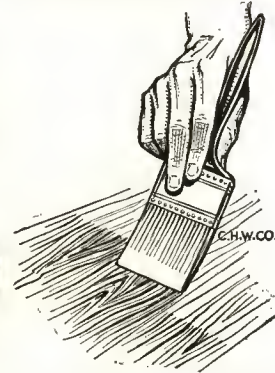

When the pigment has worked up to a creamy substance, slowly pour back the liquid into the pigment and stir while pouring. This method of treatment insures a thorough combination of all ingredients in the paint and guarantees satisfactory results in the application.

A good many people waste paint and ruin brushes by dipping the brush too far into the can. The accompanying illustration will show about how far to dip your brush into the paint. This will give you a good brush full of paint to work with and at the same time will prevent the handle from becoming smeared with paint, which in turn would unnecessarily soil the hands of the user.

**HIS PICTURE
HAS
APPEARED
ON OVER
6,000,000
CANS**

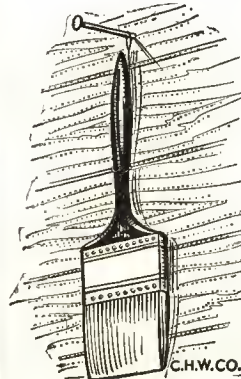

Do not take a full brush of paint directly from the can and slap it on the surface to be painted, but gently press some of the paint from the brush by holding it against the side of the can, as shown in this illustration. You will then have sufficient paint on the brush to do your work with.

While you are painting, do not press too hard on the brush, but hold it gently, running smoothly and evenly over the surface to be covered. You will then get an even coating which makes a better finish, will last longer, dry quicker and cover more surface, which is just what you want.

After your job is complete, do not by all means leave the brush in the can. The bristles, you understand, are soft from using and will bend (see illustration), and will not work as it ought to on your next job, consequently, you cannot expect to do a good job with a brush that is all out of shape. Carefully read the next article.

After your work is completed, do not let your brush dry up with all the paint in the bristles. This will not only give you unnecessary work when you again want to use this brush, but it will in time ruin bristles. The proper method of treating a brush after you are through painting, is to wash it out in benzine, and after cleaning it out well, hang it up on the nail, as shown in the accompanying illustration.

**SUPT. OF
OUR
NEW
PAINT
PLANT**

PREMIER BARN PAINT 67¢ TO 82¢ PER GAL.

GUARANTEED SUPERIOR TO ALL OTHERS

SUITABLE FOR BARN, ROOFS, FENCES, OUTHOUSES AND STRUCTURAL IRON WORK

AN IDEAL PROTECTION

A COMBINATION OF THE FINEST MINERAL PIGMENTS, PURE LINSEED AND PRESERVATIVE OILS

PREMIER BARN, ROOF AND FENCE MINERAL PAINT is a high-class preservative for barns, roofs, fences and out-buildings. It is the only paint to use for structural iron and bridge work. A lasting preparation compounded by our expert chemist, Mr. Michaelson, who is also superintendent of our new paint plant, he is acknowledged to be the best known paint authority today—has 30 long years of experience producing paint according to the most modern methods, regardless of cost, and he guarantees that as a preservative for exposed surfaces, it is the best wearing, resisting mineral paint manufactured. It is absolutely waterproof and will not peel, blister, crack or rub off and will withstand the most severe weather which outside paints have to undergo.

It is a study to meet the extreme conditions in the warping, expansion and contraction of the open grained wood generally used in barn construction and exposed to the severest sun and weather action.

Premier Barn Roof and Fence

Paint is of the highest quality composed of the very best materials, absolutely free from injurious ingredients that is possible to procure; and is manufactured and tested under the most trying conditions. The mineral pigments are thoroughly ground and re-ground with the finest linseed and preservative oils obtainable with the most modern up-to-date grinding machinery at our own plant. This places us in a position to save our customers the large profits that your local dealer is obliged to make; he can't understand how it is possible for us to furnish you with our line of Premier Paints at the low prices quoted.

Why take chances in buying your paint from a stock that has been on hand for an indefinite period. Any experienced painter will tell you that paint freshly made up (such as ours) is much superior to a paint that has been mixed for some time.

Premier Barn Paint

Represents a brand so radically different from anything ever offered as "Barn Paint," it is in a class by itself, it not only forms a protective coating (not a penetrating stain like most barn paints which leave only the stained original wood surface), but with its rich, non-fading color contains also a powerful wood preservative which kills wood germs and destructive rot producing agents.

The Oil in Premier Barn Paint

Is practically the same as we use in our Premier Ready Mixed House Paint. Our red shade is the result of our absolute control of a natural product of pure iron oxide, the most durable pigment known. The chemical composition and its absolute non-fading properties make it impossible to duplicate with any other coloring agent.

Your Barn, Roof, Fences, in fact any house on your premises in need of paint will be very much improved by using Premier Barn Paint.

A great many manufacturers nowadays take and mix a cheap Venetian Red with nothing but gloss oil as a thinner. This we know is nothing but a cheap imitation of varnish, we will admit this combination will look as good and in some cases better than ours, but its life is short, it will not wear, it will fade and crumble in a very short time.

A LASTING PRESERVATIVE

Better Than All Cheap Grades of So-Called Barn Paints

IN SOLICITING THE APPROVAL of our paint customers for a line of high grade Paint, we desire it understood at the start that popular favor with a full acknowledgment of paint manufacturing guaranteed facts. The necessity of manufacturing absolutely none but the very best is the most important of these, with the application of the long established **Premier Paint Policy** in looking after the interests of our paint customers during its long period of production.

In this day of highly perfected and mechanically ground paint, such as ours, paint is made to secure service or protection, as well as beautification. Mr. Michaelsen's ability and thorough knowledge of the combination of the ingredients to produce these results, regardless of cost, enables us to furnish you with clean, cut paint which gives it its value for cost character, placing it above all others. This, we believe, accounts for our ever increasing yearly volume, and with our reputation for square dealing, promptness and guaranteed satisfaction we take some pride in saying that our Paint has been absolutely without disappointment or dissatisfaction, and we are ever ready to make good regardless of whom was at fault, and that we have encouraged our customers to expect from items purchased **service and quality above all things.**

WE CAN NOT CLAIM to have realized the perfect Paint, but we do claim to approximate it as good as any and better than many, and we are prepared to prove that you cannot secure higher grade paint than is to be had by buying Premier Ready Mixed Barn, Roof and Fence Mineral Paint; and we have no desire to pretend that we are the originators of paint knowledge nor designers of paint manufacturing facilities, and we doubt if the good common sense of the average purchaser is taken in by such arguments; but we do desire to make the strong and straight forward business appeal that we have been making the best paints on the market and will continue to do so—there are none better than the best.

We recognize the fact that no paint manufacturing concern is too large to profit by the experience of the customer in the use of its product. The paint that is developed as a result of 30 years' experience such as ours is sure to be a paint that you can depend upon, one that is properly ground and mixed in exact proportions—thus insuring the strongest colors, durability and ease of application.

We are, 'tis true, quite fortunate not to be handicapped by trying to sell something new in the paint line, but we firmly confess that a great deal of our confidence in Premier Paint lies upon the results of the thousands of users of our Paints.

There has been up to date over one million gallons of these paints, bearing Michaelsen's picture, in the hands of buyers of good paint, and at this time the demand for our goods is remarkable, and we desire it to be strictly understood that the paint offered here is strictly reliable and guaranteed to do as we claim.

CHALLENGE BARN PAINT 39¢ to 48¢ PER GALLON

We do not guarantee the lasting qualities of Challenge Barn Paint, neither do we recommend its use. If you feel prompted to buy the Challenge Barn Paint for economical reasons, we assure you that you will find it far more economical to buy the Premier Barn Paint, which is sold under our binding guarantee and would give you the utmost satisfaction. The Challenge Barn Paint is intended only for rough or temporary work.

If you have buildings or fences or any kind of surface that you want painted and do not care for a lasting job, you will find our Challenge Barn Paint in every way satisfactory for work of this kind. The colors are strong and carefully ground; it brushes out freely and will present an attractive appearance. Owing to the very low price at which this paint is sold it is not ground in pure oil, which, of course, decreases its lasting qualities.

\$1₀₈ TO \$1₂₁ PER GALLON

as to manufacture in first part of this catalog is an original departure in beautifying, protective coating, the word coating is especially adaptable to this material as it is so radically different from other paints in composition. The secret of durability, one of the features of **PREMIER, READY MIXED HOUSE PAINTS**, is in the fact that it is almost all oil and a percentage of pigments (pigments are what tend to make paints brittle). No paint will last longer than the life of the oil which it must contain. This paint works smoothly under the brush as oil itself, hence it can be brushed out to a greater covering capacity than any other paint known. Combine this feature with the absolute non-fading properties of the colors used and you will have the secret of supremacy of our paints over any other paint on the market and the only paint you should consider if you want the best results in outside exposed painting.

IT IS POSSIBLE for us to furnish you with our line of **Paints** at the low prices quoted below, owing to the simple fact that our paint trade has developed to the point where we are able to dispose of the entire output of our large factory, and in view of our immense paint sales we are able to make our contracts on the most favorable basis, and are, therefore, in a position to save our customers the large profits that a regular dealer in paints is obliged to make. You can save 30 to 50 per cent per gallon. **PREMIER READY MIXED PAINTS** are equal and even superior to most of the paint sold at \$1.75 to \$2.00 per gallon. It often occurs that dealers will carry paint over from year to year and you have no assurance of getting your paint of uniform color and consistency. In buying **NTS** you are absolutely sure of fresh stock of the highest grade market. Bear in mind our **INSURANCE POLICY** is your gallon for gallon without cost to you, any **PREMIER READY** the utmost satisfaction.

PREMIER READY MIXED PAINTS you are absolutely sure of fresh stock of the highest grade of ready mixed paint on the market. Bear in mind our **INSURANCE POLICY** is your protection and that we will replace gallon for gallon without cost to you, any **PREMIER READY MIXED PAINT** that fails to give the utmost satisfaction.

MIXED PAINT that fails to give the utmost satisfaction. The house, barn or fence is so little, as compared to the value of protection against rot and decay, caused by the elements and to the length of time it prolongs your buildings, that you cannot afford to let your house, barn or fence stand unpainted. **PREMIER READY MIXED HOUSE PAINT** not only beautifies but protects your house against weather and other causes such as rot or decay, enabled him to find material to produce these products of a quality that is unequalled. Ready Mixed House Paint is made in 36 colors, manufactured. It is made in 36 colors as listed on our shade which it comes nearest to matching. We will also make to order prompt

What Users Think of Our Premier Ready Mixed Paints

"Has Used PREMIER PAINT On Twenty-Two Large Buildings."

Chicago House Wrecking Co.,
Chicago, Illinois.

Gentlemen: It gives me pleasure in notifying you that the 800 gallons of Premier Paint and Shingle Stain I have purchased of you in the few months past have given more than satisfaction. I am pleased to refer anyone to the Thomas Kelley Ranch, at Monon, where I have used your paint on twenty-two large buildings and three bridges, and expect to use as much more the coming season. Respectfully yours,

F. A. YOUNG,
Contractor and Builder.

PREMIER PAINT "Subjected to Steam, Freezing and a Variety of Sudden Changes."

"The Hardest Test To Which Paint Can Be Put."

Chicago House Wrecking Co.
Chicago, Illinois.

Gentlemen:

We have used the Premier Red Paint purchased from you last summer on all our plant buildings, finding same to cover with very durable utility, and in some instances the paint is subjected to steam, freezing and a variety of sudden changes from hot to cold blasts and as we are now building a reduction plant, we will paint the same with your paint. Kindly send me quotations on same, should there be any change in price.

Yours very truly,

H. L. HULBERT.

"The Best He Has Ever Used."

Cresbard, South Dakota.
Chicago House Wrecking Co.
Chicago, Illinois.

Gentlemen:

I have used your paints this last summer and can highly recommend them to anyone. They are the best I have ever used and when I need paint again I will remember you by sending you an order. You may use this as a recommend in full.

Yours very truly,
L. C. HAIN.

PREMIER DURABLE FLOOR PAINT

MIXED READY FOR USE

30^c PER QUART TO \$1⁰⁴ PER GALLON

PREMIER READY MIXED FLOOR PAINT is a specially prepared paint made to resist the wear and tear of shuffling feet, heel marks or scratches, the severe tests of alkali soap, hot water, washing and scrubbing; it will not only resist this severe action, but must retain the bright, shining surface demanded by the most scrupulous housekeeper. It is the only floor paint to buy if you want the most durable and best all around floor paint ever put on the market.

Mr. Michaelsen, superintendent of our NEW PAINT and VARNISH PLANT has studied the requirements demanded on this particular oil and varnish color, and has continually improved upon it by using special high grade ingredients that are known to have the best resisting qualities manufactured, regardless of the price.

This paint dries over night with a high gloss, and will remain dust free, and will be hard enough to walk on in 24 hours. No amount of washing will injure the surface, and will never spot white or discolor. It is equally desirable for old or new floors. We guarantee that should you use our PREMIER READY MIXED FLOOR PAINT you will be highly pleased with the results.

NEW FLOORS WHICH HAVE NOT BEEN PREVIOUSLY PAINTED REQUIRE THREE COATS. Old floors which have been previously painted, require two coats. ONE GALLON WILL COVER FROM 300 TO 350 SQUARE FEET, TWO COATS, AND FROM 200 TO 250 SQUARE FEET, THREE COATS, AND WILL DRY IN 12 HOURS. It is easily applied. Anyone who is capable of handling a brush can make a first-class job. On old floors it is merely necessary to wash the floors thoroughly, removing the dirt, dust and grease and apply the paint 24 hours after washing. The application of our Floor Paint will wonderfully improve the appearance of the room and relieve the housewife from constantly scrubbing the floor. A painted floor is sanitary and is more easily washed up.

Premier Durable Porch Floor Paint

PREMIER PORCH FLOOR PAINT is especially prepared paint for outdoor porches and stairways, to resist the rain, sun, and, in fact, the most severe weather of any climate. It is the most durable porch floor paint made, and its wearing qualities are superior to all others. This paint has been put to the most trying tests known, merely to satisfy ourselves as to its action. We all know that no other surface receives the wear and tear that porch and stairs do. It is guaranteed to stand more foot wear and general usage than all other porch paints on the market. It is practically made of the same special high grade ingredients used in our PREMIER DURABLE FLOOR PAINT. It is known to have the greatest preserving and resisting qualities for all exposed surfaces. It dries over-night and retains a high luster. Our PREMIER PORCH FLOOR PAINT will wonderfully improve the appearance of your porch and steps. It is easily applied. Don't fail to wash the surface to be painted thoroughly. Remove the dirt, dust and grease. Apply paint about 24 hours after washing. It is made in the same shades as our regular floor paint shown on page 8. **Our Paint Insurance Policy covers this line fully. Read it again on page 1.**

PREMIER READY MIXED PURE PAINT

ABSOLUTLY PURE—ITS WEARING QUALITIES ARE NOT GUARANTEED
FOR PAINT COLORS SEE PAGE 17

\$1⁴³ to \$1⁵⁶

THE DEMAND among those who absolutely must and will have a strictly **PURE PAINT** was so great that we now make a strictly pure paint in every way, as expensive as it can possibly be made, using nothing but strictly pure white lead, the best grade of zinc and linseed oil, and the highest grade pure colors for tinting wherever they can possibly be used. In fact, the paint as far as purity and standing is concerned and according to the accepted opinion of strictly pure paint authority there is absolutely nothing better on the market.

Turpentine and Tinting Colors. We put this formula on every can, kit or barrel you purchase, printed plainly, the same as any other manufacture of pure paint and according to the **Pure Paint Law**.

YOU CANNOT OBTAIN any better paint of this kind anywhere, and whenever you pay more than we ask for this paint, you are absolutely getting no return value whatever, for the cost of manufacturing this paint by others cannot be more than what we pay. Don't let anyone tell you that more expensive materials than we use in manufacturing these goods are obtainable. There is not. Should anyone discover more expensive materials, we will use them. We use the best, and there are none better than the best.

WE MAKE THESE GOODS in order to meet competition with those people who think that a lack of knowledge of manufacture after are right we are right, and we will give the same class of goods at the proper price. Our goods are exactly as we claim—absolutely pure. We use the finest material obtainable. Remember we do not guarantee its wearing qualities.

PURITY, QUALITY AND STANDARDIZATION are the important factors of **PREMIER** guaranteed **PURE PAINT**. They are in the hands of experts and by the use throughout of high grade material properly combined with a consistent regard for our customers. We take a deep and active interest in every customer as though he was the only one we do business with.

WE CAN MAKE BETTER PAINT for the same money and cheaper for the same quality than any other paint manufacturer. We know some paints are made as cheap as they can be and much better than they ought to be; others with good intentions cost the maker as well as the buyer more than they should because they are expensively produced in small quantities. It is our aim to combine what is effective in one instance with what is good in the other. This is why our **PREMIER** guaranteed **PURE PAINTS** are made as cheap as they can possibly be made. Do not take any chance in buying your paints from a local dealer.

MR. MICHAELSEN, SUPERINTENDENT of our **PAINT AND VARNISH PLANT**, is recognized all over the country as one of the few men in whom are combined the rarely associated qualities of the successful business man and the practical chemist, and to this combination is due, undoubtedly, a complete and uniformity of product throughout our plant, which perhaps cannot be duplicated and certainly is not excelled in any other paint and varnish plant in the country.

PREMIER COLD WATER PAINT

PREMIER WHITE COLD WATER PAINT is a dry powder specially prepared, the addition of cold water is all that is required to make it ready for use. There is nothing better on the market than **Premier White Cold Water Paint** for painting or to increase the light of interiors of **ware-houses, factories, shops, barns, basements, sheds, chicken houses, summer cottages, elevators, etc.** It is universally recognized for its fire resisting qualities. It is strictly sanitary and can be used in place of whitewash. It is exceedingly durable and will not **rub, scale or crack**; can be applied with a whitewash, kalsomine or wide paint brush, or spraying machine.

SATIN KOTE KALSOMINE

OUR SATIN KOTE KALSOMINE REQUIRES NO EXPERIENCE WHATEVER TO APPLY

FOR SAMPLE TINTS SEE PAGE 17

THIS IS A SPECIALLY PREPARED POWDER made to fill a long standing need for the decoration of walls and ceilings. It produces a smooth, velvety flat finish which is absolutely fire-resisting and sanitary. It will not rub off and costs much less than wall paper or paint.

SATIN KOTE KALSOMINE is the most hygienic wall coating ever offered. It is especially adapted for private residences, public schools, hospitals, hotels, etc., can be easily remove from the walls or ceiling with sponge and water, that is, if you wish to recolor your walls with new kalsomine.

ALL THAT IS NECESSARY to make it ready for use is to simply mix with holling water. Can be applied by an inexperienced person, and covers all the way from 35 to 70 per cent more surface than other so-called kalsomines.

IN THIS KALSOMINE we offer an ideal finish for walls and ceilings; will wear better, last last longer and give greater satisfaction than any other preparation used for this purpose. Again, it will not rub off.

DIRECTIONS are plainly printed on every can, and if you follow our instructions and do not get the results that we claim, we will cheerfully return your money, as our Insurance Policy covers this line also. Read it again, on page 1.

A NEW ROOM FOR 24^c

Be sure to mention name and number of color when ordering

"Premier" Auto and Buggy Finish!

45c PER QUART TO \$1.65 PER GALLON

PREMIER AUTO AND BUGGY FINISH is the very best body finishing varnish on the market for Autos, Buggies, Canoes, Swings and Porch Furniture, or in fact for any article that is exposed to the weather. It requires only a fair amount of skill with a good brush and a little care in following directions to make your Auto, Buggy, Boat, etc., look like a new model just from the factory.

SANDPAPER THE SURFACE thoroughly, wash whatever is to be painted, let it dry, then apply an even coat of PREMIER AUTO AND BUGGY FINISH, allowing sufficient time for the first coat to dry before applying the second. It is easy to apply and it dries quickly with a rich, brilliant luster. A sure protection against the action of water, and will withstand the weather of any climate.

Don't overlook the possibility of so improving your good old buggy or auto with such slight expense and a little interesting work in your spare moments. You will certainly be surprised by the results of so little effort and time you spent, and we will appreciate it very much if you will tell your neighbors how you did it with PREMIER AUTO AND BUGGY FINISH. It is a remarkable article of the finest and most durable, non-fading pigment, carefully ground into the best carriage finish (another one of Michaelsen's favorites), with the richest and finest of coach colors under a special process in a separate department of our own complete paint plant.

This paint is more durable and possesses a more smooth and elastic surface than any other carriage paint made. Two quarts of PREMIER AUTO AND BUGGY FINISH at a trifling expense of only 90c will make your buggy look like new; no matter what appearance it had it can always be improved.

If you wish a different color running gear order one quart of each color.

Nowhere else can you buy at our low price and get the results you will secure with PREMIER AUTO AND BUGGY FINISH. It is ready for the brush when you receive it. It flows out into a mirror like surface and will withstand the extreme wear and tear for which it is especially compounded.

It is put up in 8 beautiful, mellow tones and shades: Vermillion, Red, Wine, Black, Yellow, Blue, Green and Brewster Green. When ordering, be sure to mention the name of color. See colors on page 8.

"Our PAINT INSURANCE POLICY covers this line fully." Read it again on page 1.

"PREMIER" WAGON AND IMPLEMENT PAINT

PREMIER WAGON AND IMPLEMENT PAINT for painting wagons and farm machinery is as near perfect as modern paint manufacturing can possibly produce it. The quickest way to educate the average owner of wagons and implements to added durability and economy of a coat of PREMIER WAGON AND IMPLEMENT PAINT to his wagon or farm machines, is to have him hear the remarks of approval of those who see the results of his labor of a few moments with a can of our wagon and implement paint, from our own paint and varnish plant direct to you.

The paint works out so easily under the brush with a full varnish luster. The change for the old weather worn surface to the just as good as new look is so easy you will never let the earmarks of neglect show around the old place again.

A half pint of PREMIER WAGON AND IMPLEMENT PAINT at only 14c, any color, and 20 minutes' time, will make your plow look like new. Such a slight expenditure of time and small change to acquire a reputation for details, is surely the foundation of prosperity.

PREMIER WAGON AND IMPLEMENT PAINT works equally satisfactory over wood or iron, making a finished surface which will withstand all kinds of weather. In addition to greatly improving the appearance of your wagon and implements, it is real economy to paint them. It is surprising how many people will allow valuable wagons and farm machinery to decay and rust, simply because they had neglected to spend a few cents and a little time in painting them.

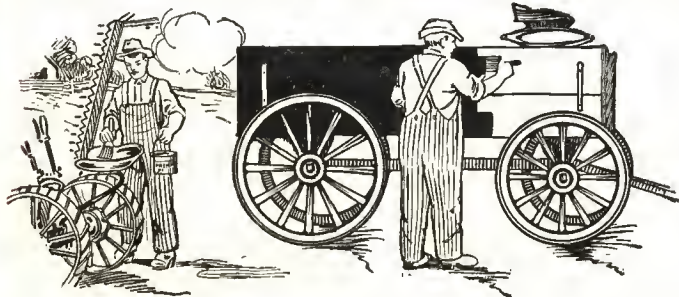

If you have a wagon or implement of any kind that needs painting, you will be surprised at the results you will obtain by using our PREMIER WAGON AND IMPLEMENT PAINT. One coat positively protects them from the appearance of hard usage. All you have to do is to sandpaper and thoroughly clean the surface to be painted and apply the paint without thinning. You cannot put in a rainy day to better advantage than by painting your various pieces of farm machinery and wagons with our wagon and implement paint.

It is made just as PREMIER AUTO AND BUGGY FINISH, except another special wagon varnish is added, which is especially prepared for this mixture with coach colors by our own varnish plant.

One half gallon at 70c will paint the average wagon and make it look like new. Each can contains quick change for the better for any weather worn implement or wagons, and by better, we mean, equal to most wagon factory results, as a cost so trifling you can't afford to be without a can or two.

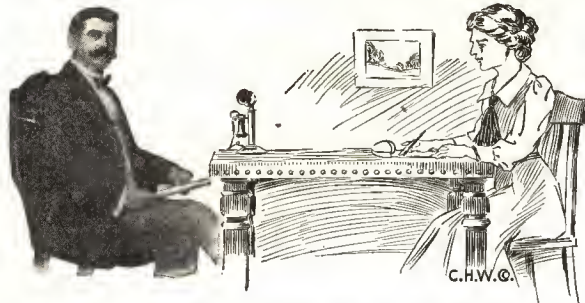

It is put up in 5 beautiful colors, Blue, Green, Vermillion, Yellow and Black. When ordering, be sure to mention the name of color. See colors on page 8.

1 gallon can, each.	\$1.35	$\frac{1}{2}$ gallon can, each.	\$0.37

MICHAEL

TALK

A COMMON QUESTION

YOU ASK ME TO SAY HOW I CAN produce a first class paint at such a low price? In the years I have made paints I have had a good many people ask me the same question—that is, how it was possible to really make a good paint at such a low price. In the beginning it was hard to convince people that it was really good paint, but year by year it gained many friends, so that the last year I manufactured paints I made and sent out over one million and eighteen thousand (1,018,000) gallons.

PAINT IS MADE FOR TWO PURPOSES,

that of beautifying wherever it is applied, and second, to protect against weather and other causes. To find material to produce these two results, regardless of cost and of anybody's opinion of them, and in the long years of using these different goods I got a thorough knowledge of what they will do and how they will act in combination. This enabled me to turn out a paint that has grown into millions of gallons all over the United States, and has made friends wherever it went.

It is not always the most expensive article that is the best, a good many substitutes nowadays are not only used side by side with the original, but in hundreds and hundreds of instances have entirely taken the original's place, producing a much better and cheaper result than that which was once considered the standard.

IF YOU COME TO ME AND SAY

I want 500 pounds of white lead and 30 gallons of linseed oil, and I do not argue anything with you but simply fill your order, and if I gave you anything else than strictly pure white lead and pure linseed oil, no matter how good or bad the article was that I had given you, I would be obtaining your money under false pretenses. In other words it would be a dishonest transaction and cannot be explained away, but, if you come to me and say you want paint for your house, barn or anything else you might want to use it for, and you leave it to me to give you an article that will do absolutely what you intend it to do, I'll guarantee to save you half your money and make it far easier for you to use it. I do not think it is anybody's business what materials I use in producing paint. You are not only treated fairly but receive the benefit of my knowledge of how to produce this paint far cheaper and better than you can possibly make it yourself.

FOUR YEARS AGO I BOUGHT A FARM.

I shipped some of my regular mixed paint for the house I was to occupy and the regular best grade of barn paint for a large barn on the premises, and a neighbor stopped and looked at the barn when it was all painted, and said: "Michaelson, how long do you think this paint will stay on that barn?" And I answered: "If God would let me live as long as that paint stays on that barn, I will ask for no more years," and if you could see that barn today you would admit that it looks fully as good, if not better, than the day the paint was applied, because it becomes absolutely part and parcel of the building. The cottage has seen no more paint since the day I painted it, and needs no new paint for some time to come. A friend of mine in the same neighborhood bought a very expensive paint in the local store and painted his dwelling in the fall of the same year, and in the spring following it came off and was also all faded out. I told him to have it scraped off and I would send him some of my paint and he would find out that he would not have to bother with painting for some time to come. He did so and it is there yet, practically as good as the time it was applied.

PEOPLE THINK

that unless they use lead and zinc and linseed oil alone they haven't got a first-class paint. That was the beginning of paint making. Since then nearly a half century in paint making has gone by and many new materials have been brought forward and perfected, and today a first-class mixed paint must contain other materials besides the three above mentioned in order to fully accomplish what is wanted. It may be true, perhaps, that a strictly pure paint looks a little better in the first few weeks after being applied than a combination paint would, but if you look at them a year after you would find that a properly combined paint such as I have turned out has withstood the weather so much better, that a pure paint is no longer "in it."

THOSE WHO MUST HAVE STRICTLY PURE PAINT,

and for people who will not take anybody's advice—and I fully respect their opinion—I make a strictly pure paint in every way and as expensive as it can possibly be made, using nothing but strictly pure white lead, the best grade of zinc and pure linseed oil, and pure colors for tinting, wherever they can possibly be used. In fact the paint as far as purity and standing is concerned, and according to the accepted opinion of strictly pure paint, there is absolutely nothing better on the market, and I am still able to save you 30 to 50% on your paint bill, if you look up the price asked for this strictly pure paint and compare it with what your dealer would ask you.

PAINT TALK

THERE IS ONE PAINT I want to talk about and that is **BARN PAINT**. I have had many followers, many people who thought that what I could do they could do, and they not only believed that they could do as well, but they thought they could go me one better—that I was too particular and buying too fine materials, especially for such a thing as barn paint. The result is that throughout the country today there is a lot of people who take and mix up a cheap Venetian Red with scarcely nothing else than gloss oil for a thinner. Gloss oil is nothing but a cheap imitation of varnish and really has no claim upon the word "oil," as it is not an oil in any meaning of the word. This barn paint will look fully as good, if not better, than the barn paint I have been making, but **it's life is short**. There is absolutely nothing to it. It absolutely cannot protect any building. It will fade out and crumble off in a very short time. I have continually improved upon the barn paint I have been manufacturing, regardless of price of materials, up or down, and the tendency in the last few years for all materials has been upwards. I am producing this barn paint and I am guaranteeing it to be as nearly perfect as any paint can possibly be made, but there are instances where a cheap barn paint might be used for temporary purposes and where it does not matter how long it lasts. I am making an exceedingly cheap barn paint, and while I do not guarantee it, I claim it is not without merit and will last a considerable time at that, but if you really want a good barn paint, buy the best grade; it will save you lots of trouble; it will protect your barn or your outhouses, or whatever you put it on, for a long, long time, and make the buildings look the way they ought to after you have gone to the expense and trouble of painting them.

I'VE MADE PAINTS FOR OVER THIRTY YEARS; I know no other occupation; no other line of goods interests me in any way, and although ten months ago I sold out of the paint business, thinking I could find some other way of employing my time, I found it impossible. I am, as I say, no Jack-of-all-Trades; I know only paint and paint only, and I found myself forced to go back into this line of business in order to be content. Believe me, it is not for the sake of making a living; in all these years I have saved enough to be beyond the necessity of making a living, but it is sheer love of making paint; the desire of producing a **first-class article** in that line, **superior to anything in the market regardless of price, the pride of still holding my own**, and I have yet to see any man who has been able to beat me in this line of business, so I feel that it is almost my duty to go back into the paint making again, as long as I am able, and give to those people who all these years have used my goods—hundreds of thousands of them—an opportunity of getting the same identical goods at the same wonderfully low price.

IT IS INDEED A FEELING OF PRIDE that I feel about these goods, for in all my travels around the country and from a good many places my friends and people that I knew had used them and spoke so highly of them that it became a great pleasure for me to be in the paint making business, and that is the reason I come back after being away for ten months, and I feel assured that I am good for making a few million gallons yet and supply paint to many of those people who have used them before, and thousands of others who can have the benefit of my knowledge. It is true I claim this paint is better than any of the so-called high grade paints on the market sold for **twice the money**, and while I would not have been doing anything wrong in getting the same price for my paint as the rest of them are getting for theirs, I gave the customer the benefit of every cent that was saved in the manufacturing of these goods and never has more than a fair profit been asked. That accounts for the enormous output, and that is what made this paint so many friends all over the United States. Every dollar you buy of these goods you get as much as a dollar can possibly purchase, and all the experience and all the care in manufacturing these goods is given you entirely free. In other words, you only pay for the materials used, at actual market prices, plus the absolutely necessary cost of manufacture. If there is anything I can do for anybody, any advice I can give them about anything they want to paint and what to use, I am here for that purpose; never too busy to answer anybody; am always ready to do so. I have done so in the past and will do so again.

I WISH TO SAY that some people who have obtained some formulas of mine and who think that the formula makes the paint, are just about as well fixed as if you would give anybody a cook book and expect them to prepare your meals the same as an experienced cook. Formulas mean nothing. It is the care and a knowledge and a constant watch that makes the paint, and no formula in the world will make a good paint by an inexperienced man. So do not let anybody convince you that he has got an article just as good and made the same way, because no man can do it.

"PREMIER" CREOSOTE SHINGLE STAIN

56¢ TO 71¢ PER GALLON

SPECIAL FEATURES

Creosote is acknowledged to be the best wood preserver known at the present time. This Premier Creosote Shingle Stain is scientifically prepared, the colors are extremely durable and penetrating and will positively not fade. We offer the shingle stain as a particularly high grade article. We do not pretend to compete with the cheap mixtures offered by many dealers. We well know that this stain will give our customers the best of satisfaction, hence make more trade from friends and neighbors. We send sample shades on real cedar shingles, upon request.

HOW APPLIED

Premier Creosote Shingle Stain can be applied with a brush after the shingles are laid or the shingles can be dipped before laying. When applied with a brush one gallon will cover about 150 square feet of surface, one coat, or 100 square feet, two coats. For dipping it requires from 2½ to 3 gallons to dip 1,000 shingles. The shingle need be dipped only two-thirds of its length. This stain can be used on wood tanks and troughs. It preserves them.

A GOOD INVESTMENT

A shingle roof is expensive and you no doubt realize the importance of using a preservative which will make them water proof and will thereby prevent them from rotting out.

PRICE FOR ANY OF THE SIX COLORS SHOWN

Be sure to give name and number of color when ordering.

4-C-901. "Premier" Creosote Shingle Stain. 1 gallon can. 71¢

4-C-906. "Premier" Creosote Shingle Stain, 50 Gallon Barrel. Per gallon. 56¢

WE MANUFACTURE VARNISH!

OUR VARNISH

VARNISHES, like paint, require extreme care in manufacture. Very often first-class materials are completely ruined in the process of manufacture, but nevertheless the materials obtainable today are far superior in many respects to those known in the trade not over 10 years ago.

Our Varnishes are made in one of the newest and best equipped varnish plants in the country. It operates on the same grounds in connection with our Paint Plant. It is the only such combination of these two industries in the United States. This close co-operation of our Paint and Varnish Plant not only gives the lowest possible cost of production, but enables us to know each product from the raw material to the finished product, and to know that they are right and realizing the importance of furnishing varnishes that will give perfect satisfaction for the purpose for which they are intended, we offer you our Premier Varnishes which is manufactured from the finest selected material obtainable.

MANUFACTURE

OUR METHODS OF MANUFACTURE and ways and means of manipulating our chemical combination (believed by most varnish makers impossible) are winning us a world wide reputation. Simplification, extreme caution and reliability are the important factors of varnish manufacturers. These can only be developed in long tried out experiments with the aid of up-to-date equipment and by the use throughout of high grade materials. This adds to the cost of production tremendously yet we are unwilling that our label should be placed on any but that which represents the highest attainment in modern and scientific varnish making.

We maintain throughout our Paint and Varnish plant a thorough system of inspection and tests which are made from time to time by our expert chemists. This insures reliability and standard of quality which prevails throughout our entire plant, and gives the consumer a perfect article for whatever purpose it is intended. From this brief talk on our factory methods, you will see that our varnish plant is on the lowest manufactured cost basis possible. These reasons are enough to warrant its use in PREMIER PAINT, the modern paint which will always be the STANDARD that competitors will continue to strive in vain to duplicate. Only the briefest sketch is possible of our varnish making and oil treating industry, which is a life's study in itself, suffice it to say, that our plant lacks nothing in modern and special equipment and is in charge of varnish makers who are at the heads of their profession yet are also under the direction of our superintendent, Mr. V. Michaelsen.

GUARANTEE

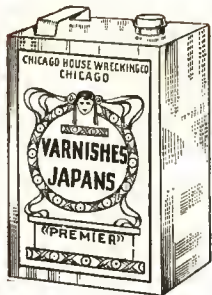

WE DO NOT, as a good many people practice, use the same article for several purposes. Each varnish is made absolutely for only one purpose and when so labeled can be used for that purpose and we guarantee it will give absolute satisfaction. By this we do not mean to say that it cannot be used for other things; for instance, if you purchase a high grade article it will do for a great many things, but if it is a comparatively cheap article, do not try to use it where a higher grade and more expensive article is absolutely necessary.

OUR PREMIER FLOOR VARNISH is a high grade article. There is absolutely no better varnish manufactured for all inside purposes. It dries quickly and will stand a lot of wear and tear such as heel marks and scratches from shuffling feet. It is also the most perfect furniture varnish on the market; in fact, it will do for any purpose not exposed to the weather.

If you knew the enormous cost of selling that ordinary varnish plants have to meet, the long time credit and the necessary large losses, you would see their utter inability to compete with us, and you will readily understand why we are able to offer you an absolutely perfect article at prices you could no where else obtain. We positively guarantee these goods and a single trial will convince you that you never used anything better. Our Insurance Policy covers this line fully. Read it again, page 1.

We have made an exhausted research into the requirements of the varnishes listed herein and have made each one to conform to those requirements to the minutest degree.

Don't try to make a furniture varnish do for a wagon varnish. Each kind is made and intended for a particular use and is so described in our simple instructions on every can.

PREMIER VARNISHES

Realizing the importance of furnishing varnishes that will give perfect satisfaction for the purpose for which they are intended, we offer our line of Premier Varnishes which are manufactured from the finest selected imported gum at the newest, largest and best equipped plant in the United States.

We guarantee our Premier Varnishes to give perfect satisfaction in every particular where directions are followed, or money refunded.

In presenting our line of premier varnishes we do so with the utmost confidence that they will prove entirely satisfactory. Under the favorable arrangements which we have made in the manufacture of these varnishes, our prices will represent a considerable saving to you. You will please bear in mind that each of the various grades offered are the best of their respective kinds on the market.

Premier Extra Light Hard Oil Finish.

4-C-1001. This is a good, durable varnish. Has a fine gloss and will rub nicely. It is light in color and will dry dust proof in 8 hours. Can be rubbed in 48 hours.

Pint	Quart	1 Gal.	5 Gal.
22c	41c	73c	\$1.27 \$6.00

Premier No. 1 Hard Oil Finish.

4-C-1003. This Hard Oil is well adapted for any inside work. Dries hard over night with a gloss and is elastic and durable. It is slightly darker in color than our Extra Light Hard Oil.

Pint	Quart	1 Gal.	5 Gal.
25c	44c	78c	\$1.35

Denatured Alcohol Orange Shellac.

4-C-1039.

Pint	Quart	1 Gal.	5 Gal.
27c	47c	83c	\$1.45

Denatured Alcohol White Shellac.

4-C-1041.

Pint	Quart	1 Gal.	5 Gal.
28c	50c	90c	\$1.60

Premier Floor Oil.

4-C-1043. Premier floor oil. Prepared especially for floors of residences and stores, small quantity applied with a cloth will bring out the natural color, and make scrubbing unnecessary. Floors oiled with Premier Floor Oil are easily cleaned by washing them with soap and water.

Pint	Quart	1 Gal.	5 Gal.
20c	30c	52c	90c \$4.00

Paint and Varnish Remover.

4-C-1045. Softens the paint or varnish so that it can be removed easily with a piece of cloth or putty knife. Removes every vestige of paint from the surface so that it looks like new. 1 pint will remove the varnish from 1 to 2 table tops. 1/2 gallon will remove the paint from a floor 12x12 ft.

Pint	Quart	1 Gal.	5 Gal.
28c	48c	90c	\$1.60

Premier Black Asphaltum.

4-C-1047. For finishing all kinds of castings, smokestacks, fenders, coal hods, iron work of agricultural implements, etc. It produces a jet black brilliant finish and absolutely prevents rust or corrosion. It is heavy in body, and quick drying.

Pint	Quart	1 Gal.	5 Gal.
13c	22c	35c	55c \$2.35

Premier Liquid Wood Filler.

4-C-1049. For filling or first-coating all kinds of close grained natural woods, such as pine, poplar, etc., that have not been previously finished. It thoroughly seals up the wood pores and effectually prevents suction or the absorption of moisture. This material is transparent and does not need to be rubbed off or sandpapered before applying varnish coats. It does not sink away like varnish, but dries on the surface, thus making it equal for work of this nature to 2 coats of varnish. A coat or two of varnish applied on this work produces a really remarkable finish.

Quart	1 Gal.	5 Gal.
40c	78c	\$1.45 \$6.95

Premier Paste Wood Filler.

4-C-1051. All open grained woods such as oak, ash, etc., should be filled, in order to obtain a perfect varnish. Our Paste Filler is better than any other, as it completely fills the pores, making an impervious surface over which to varnish. Made in three shades.

1 pound can	5 pound can	25 pound can
7c	30c	\$1.40

Crack and Crevice Filler.

4-C-1053. A superior elastic preparation for filling cracks in floors or woodwork before painting. Will not shrink.

1 pound can	5 pound can
12c	55c

Premier High Gloss Enamel

FOR FINE INTERIOR ENAMEL WORK

A HIGH GRADE INTERIOR FINISH on woodwork or plaster walls. Especially for use on walls where you wish to have a real enamel finish. This result has been secured in the Premier High Gloss Enamels so well that the largest and most modern hospitals have placed their stamp of approval on them and specifically state they will consider no others.

These Enamels are especially prepared to meet the "easy to apply" requirements of the novice or housewife. They work easily under the brush and will produce the same results as though you secured the services of an expert. It is particularly adapted for walls and ceilings in bedrooms, bathrooms and kitchens, making an impervious enamel finish. It is also used extensively for work on headsteds, exposed pipes and

other metal surfaces. Made in twelve beautiful, delicate shades, representing the highest attainment in the study of compounding paint materials to produce a marble tile-like surface:

White	Vermillion	Orange	Green
Pale Blue	Sea Green	Royal Blue	Carmine
Bright Green	Rose Pink	Silver Grey	Black

4-C-921. Prices for above colors: 1-Pint can...20c. 1-Quart can...45c. 1/2-Pint can...77c. 1 Gallon...\$1.47

Bath Tub Enamel

AN ORDINARY IRON TUB can be made to look like the finest porcelain tub by the use of our Bath Tub Enamel. Produces a hard, smooth, highly polished and non-absorbent surface. Effectually resists the action of hot and cold water, soaps and other preparations used in baths. In fact, it will resist the wear and tear which bath tubs usually undergo. With one pint you can do over and give it that new effect of an iron, tin or paper tub, or you can use it with the same remarkable results on sinks, and wood and iron work about the house. No skill is required. It can be easily applied with a 1 1/2-inch varnish brush and will dry over night.

4-C-903. Half pint...25c. 1-Pint...45c. Quart...75c

Premier Floor Wax

PREMIER FLOOR WAX is a specially prepared compound for polishing hardwood floors. It produces a lasting, brilliant polish. Floors can easily be kept clean by using Premier Floor Wax as dirt and dust will not stick to it; it will not change the color of the wood, as it is transparent. It can easily be applied, dries quickly and can be rubbed to a brilliant polish, producing a lasting finish. One pound is sufficient for about 300 square feet. Directions are simple and easily understood and are printed on every can. It is put up in 1-pound cans only.

4-C-900-A. Per can...27c

Premier Flat Wall Paint

THIS MATERIAL must not be confused with kalsomine or water paints, as it is strictly an oil paint, drying down to a beautiful, soft, non-gloss tone and possessing that tough, elastic finish which prevents plaster or cement from cracking or crumbling, whereas water paints would not. Cheaper than wall paper, more easily applied and more sanitary. Lasts forever, and only needs washing with soap and water to make it like new. Will not rub off on the clothes as kalsomine does. It is prepared in liquid form ready for use, and put on with a brush; dries to a hard surface, which may be washed and is unaffected by steam or heat. Will not spot, turn color or fade. Made in the following nine shades (see house paint color card): Tan, Light Yellow, Pea Green, Grey, Yellow, Pink, Azure Blue, Deep Green, Maroon. Remember that these shades appear on our regular color card, and this Flat Wall Paint shows the same color in every way as the house paint color card shows, except that it will not be glossy, but will be flat and without luster. Applied with a brush, same as house paint. Figure 1-gal. can will do 200 square feet two coats.

4-C-905-A. 1/2-Gallon can, each...69c. 1-Gallon cans...\$1.05. 1-Gallon cans...\$1.56. 5 and 10-Gallon cans...1.53

Premier High Gloss Lacquer

FOR REFINISHING FURNITURE AND OTHER WOODWORK

PREMIER GLOSS LACQUER should be in every household. Scratched and marred pieces of furniture and floors can be made into new and beautiful objects; can be applied by the most inexperienced person, and at an expense of a few cents you can convert a piece of furniture on which the finish has become marred so that it will look like new. Best of all, this beautiful finish can be applied by any housewife and the work will be as satisfactory as if an experienced wood finisher had done it.

If you have in your house, from hasegment to garret, a chair, table, chiffonier, bedstead, book case or desk or any floors or woodwork, baseboards or doors which you would like to renew in the natural wood colors, all you need is a small amount of Premier Gloss Lacquer. A few minutes' time and a small can of Premier Gloss Lacquer will change any article in the house to a bright, new-looking object. Directions for use of Premier

Gloss Lacquer are printed on all cans. Made in the following shades:

Light Oak	Flat Black	Dark Oak	Mahogany	Flat White
Cherry	Rosewood	Moss Green	Royal Red	Ground Color
Gloss White	Walnut	Gloss Black	Clear	

Prices for any of the above colors:

Premier Varnish Stain

Stains and Varnishes in One Operation

Recommended for use over a surface already varnished or painted, such as old furniture, varnished or painted woodwork. It is necessary, in order to obtain the best results, to use a stain of a similar shade as the old finish. You cannot finish a Mahogany chair Light Oak by applying Light Oak Varnish Stain. If a change of color is desired, we would recommend the use of our Premier Gloss Lacquer. By using the Ground Color as a first coat and the Premier Gloss Lacquer as a finishing coat the change of color can be made. Premier Varnish Stain dries hard with a high luster and is easily applied with a varnish brush. It is made in the following colors: Cherry, Mahogany, Rosewood, Dark Oak, Light Oak, Walnut, Antique Oak. See colors on page 19.

4-B-171. Per half pint can...15c. Per 1-pint can...21c. Per 1/2-gal. can...\$0.72. Per 1-quart can...38c. Per gallon can...1.30

Oil Stains

A Perfect Imitation of Natural Wood

Used for staining interior woodwork and other work not finished. Dries with a flat finish. One or two coats of varnish will produce a fine glossy surface. It is easily applied with a varnish brush. Made in the following shades: Cherry, Dark Oak, Mahogany, Light Oak, Rosewood, Walnut, Antique Oak.

Prices on above shades:

4-B-173. Per 1/2-pint can...	13c
Per 1-pint can...	19c
Per 1/2-gal. can...	\$0.66

Per gallon can...	1.24

Wire Screen Enamel

4-C-931. A small can of our Premier Screen Enamel and a few minutes of easy work with the brush will make your screens look like new. It will not clog the mesh and will double the life of any screen; it dries hard and quickly, with a rich, brilliant gloss. To apply, brush one side only, and use just enough paint so it will not run. Easily applied with a small varnish brush. Put up in two colors—black and green.

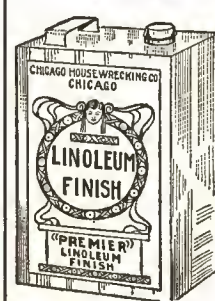

Price, half pint...14c. Pint...24c. Quart...48c

Premier Stove Pipe Enamel

4-C-935. Premier Stove Pipe Enamel is the best coating for stove pipes, stoves, furnaces, grates, smokestacks, iron fences. Will give any iron surface an enamel finish. Wears longer and has a smoother, more elastic finish than any other stove pipe enamel on the market. We have reduced to a liquid state a mineral of volcanic deposit of intense blackness. This liquid enamel will consequently withstand heat and retain its beautiful, brilliant, black luster. It will not peel or burn off. It must be applied when the surface to be painted is cold; it is ready for the brush and dries quickly. A pint can is sufficient for six lengths. It is put up in black only. Price, 1/2 pint...12c. Pint...20c. Half gallon...70c. Gallon...\$1.25

Premier Linoleum and Floor Oil Cloth Finish

4-C-933. Do not let your floor, oil cloth or linoleum wear out when you can, for a few cents, preserve it and give a most lasting and finer finish than it had when new. Put this material over your linoleum. It gives it a hard, smooth, elastic finish that will stand as the linoleum does and will not crack. It overcomes the uneven wearing quality of linoleum, which has always before been objectionable. It keeps your floor bright and beautiful and largely increases the life of the linoleum or oil cloth. Not affected by hot or cold water. One coat put on at night will be all that is needed—dries to walk on the next morning. One quart will cover about 175 square feet.

PREMIER MINERAL ASPHALT PAINT

THE ONLY COLORED PAINT MANUFACTURED WITH AN ASPHALT BODY

For Wood, Metal or for Composition Roofing Surfaces.

The only colored paint manufactured with an asphalt body and for this reason is an ideal roofing coating. It is tough and elastic. The colors produce a fine effect and will harmonize with the shades used in your house paint.

The only colored paint on the market that will give perfect satisfaction on felt, rubber and composition roofing.

Premier Mineral Asphalt Paint is entirely different from any other brand that is manufactured. It is made of the best grade of Trinidad Asphalt melted and specially treated and combined with pure kettle boiled Linseed Oil. Can be used to advantage on any kind of surface. It is not affected by contraction, expansion, acids, gases or alkali. When dry it forms a tough, elastic and impervious surface. It has a high gloss and is the most durable and best preservative paint on the market.

We recommend it for wood, metal or composition roofing surfaces.

Covering capacity: On an old Surface 1 gallon will cover from 200 to 250 square feet. On a Wood Surface 1 gallon will cover 200 square feet 1 coat work or 100 square feet 2 coat work. On Prepared roofings 1 gallon will cover 100 square feet. Guaranteed not to contain a trace of coal tar.

Protecto Asphalt Paint

An unequalled preservative paint for roofs and exposed surfaces. After much investigation we are able to offer in our Protecto Asphalt Paint what we believe is undoubtedly the best paint on the market for preserving metal and felt roofs, wire fences, fence posts, tanks, agricultural implements, and in fact all exposed surfaces, from the ravages of rust and decay.

Protecto Asphalt Paint, made of the highest grade of Asphalt, combined by special process with mineral oils. No coal tar, rosin or other cheap materials enter into its composition.

When applied to a metal surface one gallon will cover 300 square feet, giving a glossy black finish which is not affected by the weather and which will not crack or peel. For use around factories, it is unequalled on smoke stacks, boilers, pipes and machinery. It will not taint the water and can be used for painting the inside and outside of cisterns to prevent seepage.

Our Premier Lead is non-poisonous and guaranteed to be more durable by far than any pure carbonate of lead manufactured. It is carefully ground and scientifically formulated mixture of lead and zinc ground in pure oil. Instead of using common acid corroded "Dutch Lead," such as is commonly sold and used, and is the cause of all the cases of painters' colic and lead poisoning, we use a fire refined lead which will not poison the user if it happens to get into the pores of the skin. The zinc prevents the lead from chalking and powdering or rubbing off on the clothes, as the years go by, and this Premier Lead is way ahead of ordinary so called "Pure" and "Old Dutch Process" White Leads.

Our Eclipse Lead is an excellent lead for all around use—especially recommended for priming coats or use with colors. It is absolutely durable, ground in pure oil, fairly white, but is not intended for the highest class of service and for white work—better use our Premier Lead for such uses, as it will give better service

PREMIER GRAPHITE ROOF CEMENT

A patented leak stopping cement for tin, paper or shingle roofs, contains pure graphite with its water shedding properties, combined with long fibre of asbestos and a special water proof elastic drying oil which cements over the leak indefinitely.

This roof insurance is well worth having on hand for emergencies and no composition tin roof is properly laid without the laps and joints freely coated with this cement. Comes in semi-paste form.

"DEATH TO CHICKEN LICE"

This liquid contains elements that absolutely clean out vermin of every description.

The interior of a chicken house coated with this material will be free from chicken lice, and all other chicken germs, for a long time.

The pests that annoy your chickens and render them poor, scrawny and unprofitable simply cannot stand this liquid.

PAIN, VARNISH, KALSOMINE AND WHITEWASH BRUSHES

OUR LINE We are offering a line of well selected brushes, all of which are made in the best possible manner and are exceptionally good values. Every brush is guaranteed fully in every respect when used for the purpose for which they are offered. In this connection we think it advisable to offer a few suggestions regarding the care of the brushes.

CAUTION The very best, as well as the cheapest, brush can be ruined, at least partially so, if not properly cared for. Paint and Varnish, as well as Kalsomine and Whitewash Brushes, should not be allowed to stand on the ends of the Bristles over night, but should always be cleaned thoroughly before quitting work. Paint and Varnish Brushes should be placed in oil or varnish and Kalsomine and Whitewash Brushes hung up. Should you find a brush that has become loose from shrinkage take a small quantity of water, open the brush and pour the water into the center. This will swell the parts and make the brush as firm as when first made. New brushes when put in work are apt to shed a few bristles that have not been fastened when made.

INSTRUCTIONS Care is taken to remove loose bristles before shipment, however, it is impossible that every brush is free from loose bristles, and we therefore recommend that before starting on a job that the brush be dipped in paint or varnish and be drawn across a rough board or surface several times. This will generally free the brush from any loose bristles. Kalsomine and Whitewash Brushes must never be put in newly slacked lime or acids, as it will destroy the bristles. If the mixture is too hot to put your hand in, it will burn the bristles and thereby destroy the brush. All brushes that are cement set are for use for paint, varnish or water color and must not be used in shellac or alcohol.

"RUBBERSET" BRUSHES The bristles are solidly imbedded in hard, vulcanized rubber, which cannot be dissolved by turpentine, oils, benzine, lacquers, alcohol, hot glue, grease or water. They can be used in any liquid for any purpose. The bristles cannot come out. Length given is length of bristles clear of the ferrule.

RUBBERSET HOME BRUSH

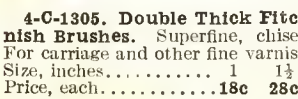

For Varnishing, Enameling, Staining and Painting.

4-C-1301. The most durable brush made for home use. Metal bound, selected Chinese bristles, solidly imbedded in hard vulcanized rubber and will not come out. Guaranteed to stand any amount of rough usage. Width 2 inches. Price..... **32c**

We Sell Bargains Nothing Else

IMPROVED RUBBER GRAIN-ING ROLLS.

4-C-1501. Improved wood grainers. Are composed of three rubber rolls, 5 inches in length. With the corrugated roll any known growth of wood can be imitated. Quarter-sawed oak grain is produced with roll No. 2 with the irregular grooves. No. 3 is used in place of combs for straight line work. In connection with the other two rolls this roll is made with three sizes of combs. Any one with a set of improved grain-ing rolls, with a little practice can do a perfect job of grain-ing and imitate the natural wood so that it will be almost impossible to distinguish the natural grain from the grain made by improved wood grainers. Complete instructions packed with each set. Weight, 14 ounces. Price per set of 3 rolls. **98c**

HOUSEHOLD GRAINING ROLLERS.

4-C-1503. For graining doors, wainscoting, floors and wood-work of all kinds. A first class job can be done without previous experience. We refer you to our Colors in Oil for graining colors. All that is necessary is a can of Graining Colors and a small quantity of turpentine or benzine and a household graining roller to do first-class work. Price per roller, only **30c**

RUBBER GRAINING COMBS.

4-C-1505. Used in place of steel combs for a certain class of work. The rubber securely set in wood handles. The highest grade rubber comb made. Packed in cardboard boxes in sets of 12 combs assorted, six, nine and twelve teeth per inch. Price per set of twelve combs. . **69c**

STEEL GRAINING COMBS.

4-C-1507. High grade English grain-ing combs. Best quality of steel, in sets of 12 combs assorted, 1 to 4 inches, in tin case. Price per set. **75c**

GRAINING CHECK ROLLERS.

4-C-1509. Double line graining check roller for producing the oak overgrain. A better imitation is obtained with double line check roller than with single line rollers. **55c**

GLASS CUTTERS GUARANTEED TO CUT.

4-D-1511. Royal Glass Cutters. Hard, bright steel frame, cutters revolve on steel pin in steel cap. Japanned Handle. Cutter made from the highest speed steel. **6c**

WHITEWASH AND PAINTING MACHINE

(Can Also be Used for Spraying Trees, Plants and Shrubbery.)
PAINTING AND WHITEWASHING BY MACHINERY
REDUCES THE COST OF PAINTING AND WHITEWASH-
ING TO A MINIMUM.

WE OFFER OUR CUSTOMERS THE FINEST, CHEAP-
EST AND BEST WHITEWASHING MACHINE EVER
PLACED ON THE MARKET. Nothing will equal it for white
washing barns, fences, poultry houses, cellars, factories, etc.
It is adapted for use both for whitewashing and cold water
paints.

ITS USE. CAN ALSO BE USED FOR ANY KIND OF
SPRAYING. In addition to being used for whitewashing ma-
chine, it makes a first-class sprayer, as it will spray trees 25 feet
high or more by using an extension tube to elevate the spray.

CONSTRUCTION. The body is made of 24-gauge galvan-
ized steel and is fitted with a high grade ball valve brass cylinder
pump which produces a high pressure. Each machine is fitted
with an agitator which works at every stroke of the pump and
keeps the solution thoroughly agitated. The top is easily removed when you wish
to clean the machine. It is guaranteed to be the most practical machine on the
market and entirely satisfactory. Furnished complete with solution strainer.
Shipped direct from factory Southern Illinois.

4-B-319. Size No. 6. 10 Gallon Galvanized Body Whitewashing and
Painting Machine. Complete with 10 feet of 1/2-inch high grade hose, 1 nozzle
and 8-foot extension rod.

STEEL WOOL AND SHAVINGS.

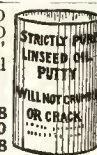

4-B-353. Steel wool is made of fine fibers
of steel, resembling curled hairs, and is used
as a substitute for sand paper, emery and
pumice stone. When used for rubbing down
fillers and varnishes, it will be found superior to
sand paper or pumice stone.

The steel shavings are coarse and are used for
removing rust from iron preparatory to painting.
It is also used for cleaning floors or any surface
that has been previously varnished.

SAVE ONE-HALF ON YOUR WALL PAPER PURCHASE

Wonderful Values in Wall Paper.

AMONG ALL THE GREAT BIG VALUES WITH WHICH THE PAGES OF THIS CATALOG ARE CROWDED, THERE IS NONE GREATER THAN WE OFFER IN WALL PAPER. We contracted for an enormous quantity of Wall Paper for this year, which thus enabled us to procure prices much less than any other concern, who is unable to handle the immense quantities we dispose of. Just another evidence of the price-reducing power of ready cash and our ability to swing big deals, and it is our purpose to give our customers the benefit of our unlimited purchasing powers. We, therefore, quote prices such as have never before been equalled for the same high-grade and expensive designs.

Enormous Stock. Remember, we buy our Wall Paper direct from modern Wall Paper mills, whose equipments are the finest, whose organizations are the best, where not one ounce of anything but the very finest of stock is handled and where the most skilled workmen are employed. No injurious or dangerous chemicals are used in the manufacture of our Wall Paper; only the very best and purest materials are allowed to enter into the colors. Our Wall Paper is absolutely pure, harmless, and very hygienic, and will, with proper care, last for years.

Our Guarantee. We positively guarantee every yard of Wall Paper sold by us to be exactly as per sample and exactly as described. If you receive from us any Wall Paper which is not entirely satisfactory, we ask you, as a favor to us, to return it at our expense and we will cheerfully refund your money, together with any transportation charges you have paid.

Send For Our Free Wall Paper Sample Book.

Complete Sample Book. Our Wall Paper Sample Book, mailed to you free of charge on request, contains samples of the most artistic and very latest designs in Wall Paper. Every design shown is cut direct from the rolls in our stock. You get exactly the same quality and design that you select from our sample book. We have eliminated all cheap grades of paper and designs, and show only the best quality and most up-to-date patterns at prices from 33 to 50 per cent lower than you pay elsewhere for the same grades. We carry an enormous stock of Wall Paper in our warehouses, and therefore we are always in a position to ship any order for Wall Paper, no matter how large, the same day your order is received.

Valuable Information. You will find in our free Wall Paper Sample Book, information showing how you can do your own decorating as artistically as the experienced paper hanger, also how to find the quantity of paper you will need for various rooms, how to paper walls that have never been papered, how to make your own paste and general preparations before beginning. We list in our free Wall Paper Sample Book, paper hangers' tools and supplies, mouldings, etc.

Send your name and address for our free Wall Paper Sample book, showing all new and original designs, and it will be sent to you absolutely free and post-paid.

Special Proposition For Paper Hangers and Wall Paper Dealers

Sell Wall Paper. A proposition that will appeal to anyone wishing to sell Wall Paper at a big profit. We issue a complete Wall Paper Sample Book for paper-hangers, and Wall Paper dealers showing samples about 18 inches long and the full width of the paper, of all of our Wall Papers, Ceilings and Borders, as well as Oatmeal Papers and Varnished Tiles.

Make Money. This Sample Book is especially intended for those wishing to sell Wall Paper, as no prices appear on the Samples. We send a special price-list with each Sample Book, so you can make your own selling prices. You can add 25 to 50 per cent to our prices and then under sell other Wall Paper Dealers.

Best Quality. Do not think because our prices are so far below those of other concerns dealing in Wall Paper, that our goods are not high-grade, as we absolutely guarantee all Wall Paper sold by us to be the very best on the market in color, design and quality of paper. You can, therefore, rest assured that in purchasing your stock of new Wall Paper from us, you are getting the best bargain obtainable.

How to Order Book. Our Sample Book costs us \$1.00 and we are, therefore, making a nominal charge of 35c each, to cover postage and to insure its getting into the hands of prospective users. This amount will be allowed on your first order placed with us for Wall Paper, amounting to \$10.00 or over.

THE ILLUSTRATIONS shown on the four following pages are exact photographic reproductions of our Wall Papers in actual colorings, and represent the designs just as they are. These illustrations show the complete combination of side wall, ceiling, and border as they will appear when on the wall, the only difference being that the illustrations are reduced. The width of the paper is 18 inches. If, however, you desire to see the quality of the paper, send for our Special Wall Paper Sample Book, which we will be glad to send you absolutely free and postpaid.

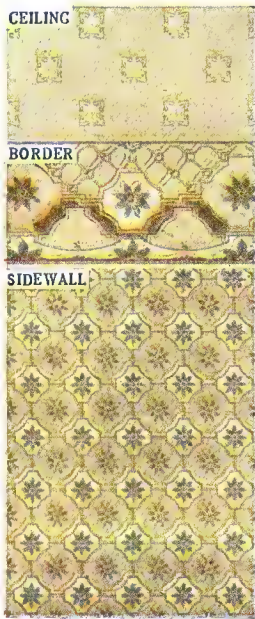

What you want in wall paper is beauty of pattern, style, appearance and wearing quality. Our Wall Papers possess those features to a greater degree than any other ever sold at double our price. We show the most complete assortment of the very latest and most beautiful designs to be seen anywhere, each number being exceptional value at the price we quote, which is in many instances about one-half what you would pay elsewhere for the same grade.

Our Wall Papers are especially designed to enhance the beauty of your rooms. They are designed to harmonize with the surroundings and furnishings. We know that any pattern you select from this catalog will please you, because it will outlast any high priced paper on the market and look infinitely better. When we say that we offer the greatest value in Wall Paper ever offered we place our reputation back of the statement.

 19-WP-637. Ceiling, Tile. Per double roll **30c**
 19-WP-734. Border, 6 inches wide. Per yard **2c**

SIDEWALL

"DUPLEX OATMEAL."

This is very popular for use in dining rooms, etc. 30 inches wide.
 19-WP-537. Dark Brown. Per roll **20c**
 19-WP-538. Light Tan. Per roll **20c**
 19-WP-539. Nile Green. Per roll **20c**
 19-WP-540. Red Per roll **20c**

Remarkable Bargains in High Grade Room Mouldings

FACTS CONCERNING OUR ROOM MOULDINGS

In our stock of room mouldings you will find only the **best material** used. We do not carry any second grade mouldings, and we guarantee that you will be satisfied with any mouldings you get from us. These facts should be remembered in buying room mouldings, plate rails, chair rails, etc.

We can secure a cheaper grade from our factory and quote it at a lower price than that on our list, but we know it would not be satisfactory to our customers.

We positively guarantee that our moulding cannot be equaled in price or quality anywhere.

This is an **All Gilt Bead**, $\frac{1}{2}$ inch wide and is used for paneling on ceiling or side walls. Can be used with any color wall paper or decoration, giving a very finished effect.

No. 19-B-1873. Price, per foot. **1¹/₂c**
